

## FLU SPREADS AT MISSOULA.

MISSOULA, Oct. 17.—Sixty-seven new cases of influenza, with five deaths, were reported for the past 24 hours by the health officers tonight. This is an increase of seven in the number of cases over yesterday, while the number of deaths is the same. Two cases of smallpox are reported among the men taking military training at the state university. These have been isolated.

### Missoula Cases Increase
