

Aerial Field Lease Contracts Prepared

Dr. F. J. Bell and Attorney O. K. Grimstad, composing a committee of the Billings Commercial club, have prepared contracts for the lease of an 80-acre tract of land above the rimrocks for an aviation field. The contracts will be presented to the trustees of the club next Friday.

If the lease is effected, the work of preparing the field as a landing place for aircraft will be started early. All obstructions will be removed, the sage brush will be cleared away, and the ground will be gone over with a disc and then leveled.

The committee believes that an ideal landing place can be arranged with very little work, and that when completed will attract the location here of one of the proposed government aerial mail stations.

Rimrock Airport Land Is Leased
