

PRICE OF ICE

Last month we announced a reduction in prices of coal and many consumers benefited by phoning 1152.

Now nature has furnished us with a very large crop of 12 to 14-inch clear, pure, hard, natural ice, the most perfect ever seen in the city.

It is so solid and firm that it will last longer than ordinary artificial ice, and therefore it is more economical.

This space contains photograph of another cake of our ice. It was so clear, pure and white it did not affect the plate.

As our ice is already made and we have several thousand tons in store, we are prepared to take care of and will give real service in all parts of the city.

Our price in residence sections is now \$1.00 per ton less than any "market price" that might be quoted by our competitors. Wholesale price given on application.

Peoples Coal & Ice Co.

(Yes, we deliver on the north and south sides.)

Phone 1152.
