

Treatment Is Used for Many Local Victims of Recent Polio Epidemic

to more people.

When Helen, 42, was born in 1903, she was one of the first children in the world to be vaccinated against polio. Her mother, Mrs. J. C. Smith, was one of the first to have her child vaccinated against the disease.

At the time, the vaccine was made from the spinal fluid of children who had died of the disease. It was a very dangerous procedure, and many children died as a result of the vaccination.

Today, the vaccine is made from a weakened form of the virus, and it is much safer. It is given to children at the age of two, and it is very effective in preventing the disease.

Helen, who is now a nurse, has been vaccinated several times. She says that she has never had any trouble from the vaccine, and she is glad to have it.

Many other children in the area have also been vaccinated. The Billings Health Department has been very successful in its campaign to vaccinate children against polio.

The disease is still a threat, but the vaccine has made a big difference. It has saved many lives, and it has helped to reduce the number of children who are paralyzed by the disease.

It is important for all children to be vaccinated. It is the best way to protect them from this terrible disease.

THE NEW POLIO VACCINE

The new polio vaccine is a very important development. It is a weakened form of the virus, and it is much safer than the old vaccine. It is given to children at the age of two, and it is very effective in preventing the disease.
