

PLAN 20-CABIN TOURIST CAMP

El Campo, Inc., Will Expand Business on New Site.

Plans for the immediate construction of a 20-cabin tourist ground, to be located across the Yellowstone highway from the main gate of the Midland Empire fairgrounds, were announced Friday by Charles Day, vice president and general manager of El Campo, Inc. The tourist camp, scheduled to be completed by May 15, will cost approximately \$15,000.

General design of the camp will be Spanish, construction following the same lines as the present El Campo located a mile west of Billings.

Each cabin will be 12x18 feet, Mr. Day said, and will have modern equipment, including individual baths and garages, gas and running water. The new El Campo also will maintain a central kitchen, laundry, filling station and grocery store.

While work is in progress at the new camp ground, eight new cabins will be added to the present camp west of the city, Mr. Day said. This will make a total of 20 cabins on this site. Both grounds will be operated under the firm title. The firm recently was incorporated with Rockwood Brown president.
