The Roscoe that will turn the steel in Billings' 100 million-ton steel mill into a product for the Billings, Mont., steel-erect facility, Roscoe Steel is providing the steel for the structure. The Roscoe is a 70-ton steel girder that will be used to build the 100-story tower.

Leading the advancement to the 100-story tower is Roscoe Steel's CEO, Bob Dewall, who is the son of the founder, Bob Dewall Sr. Dewall Sr. was a pioneer in the steel industry, and his son, Bob Dewall Jr., is now the CEO. Dewall Jr. is a third-generation steel erector, and he is proud to continue the family tradition.

Big and heavy
Roscoe Steel employees at the Billings plant are shown working on a large steel girder. The girder is being prepared for shipment to the construction site.

About Roscoe Steel
Roscoe Steel is a family-owned steel erector and fabricator. The company has been in business for over 100 years and is known for its quality work and customer service.
